

## The How to get your Drent approved for Breeding

### Checklist

**STEP 1:** Go to the Breeder's Login page and sign the Code of Ethics. Once you sign the DPCNA Code of Ethics, you will be granted access to the password protected breeder's page with all the e-forms you will need.

**STEP 2:** Look for the e-Conformation Exam and upload all of the required photos. We have provided examples for you emulate. The Board will convene an e-Meeting to grade your Drent.

**STEP 3:** Wait for your e-Conformation Exam results. With passing results, you should proceed to the next step.

**STEP 4:** Seek out an AKC Canine Good Citizen exam for your Drent and provide documentation that your dog passed and/or is a certified therapy or service dog. Also, your Drent may be evaluated by a Board Member.

**STEP 5:** Start your dog's health testing, this has two steps:

a) Get the CAER exam for your dog's eyes done first, it isn't expensive, but finding a qualified veterinarian can be tricky. If you have a "normal" passing result, move onto the last item.

b) Schedule your Drent to have his/her hips and elbows x-rayed and sent off to OFA.

**STEP 6:** Upload PDF copies of the documents: Conformation, Temperament, Eyes, Elbows, and Hips to the "Approve Me" page

**STEP 7:** Authorize the Club to publish your approved Drent on the Stud page (if applicable)
